

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of the Claims:

Claim 1 (Currently Amended) Method of treating and/or preventing obesity or being overweight in/of a subject, said method comprising administering to the subject an edible composition comprising an effective amount of ~~whey-protein- and/or whey protein hydrolysate, the whey protein-and/or whey-protein-hydrolysate-being-able to induce the~~ cellular release of glucagon-like-peptides and cholecystokinins.

Claim 2 (Canceled)

Claim 3 (Previously presented) The method according to claim 1, wherein the whey protein hydrolysate comprises hydrolysates of β -lactoglobulin, α -lactalbumin or a mixture thereof.

Claim 4 (Previously presented) The method according to claim 3, wherein the hydrolysates of β -lactoglobulin and α -lactalbumin are present in the edible composition in a weight ratio of from 5:1 to 1:5.

Claim 5 (Previously presented) The method according to claim 1, wherein the whey protein hydrolysate has a degree of hydrolysis in the range of from 1 to 20%.

Claim 6 (Canceled)

Claim 7 (Previously presented) The method according to claim 1, wherein the edible composition is a food composition used in a weight loss or weight control plan.

Claim 8 (Previously presented) The method according to claim 1, wherein the edible composition comprises a meal replacement product.

Claim 9 (Previously presented) The method according to claim 8, wherein the meal replacement product is a ready-to-drink liquid, a liquid produced from a soluble powdered product, a soup, a dessert, a bar, a cereal based or pasta based or noodle based product, or, a soluble powdered product.

Claim 10 (Canceled)

Claim 11 (Canceled)

Claim 12 (Currently Amended) The method according to claim 10¹, wherein the whey protein hydrolysate comprises hydrolysates of β -lactoglobulin, α -lactalbumin or a mixture thereof.

Claims 13-18 (Canceled)

Claim 19 (New) Method of treating obesity or being overweight in/of a subject, said method comprising administering to the subject an edible composition comprising an effective amount of whey protein hydrolysate, the whey protein hydrolysate being able to induce the cellular release of glucagon-like peptides and cholecystokinins.
